

AI PRD Generator

Product idea: Smart Task Reminder System User can type: "Pay electricity bill at 7 PM on 25th" "Call doctor tomorrow at 10 AM" App converts it into: Date + Time + Reminder notification Features: Multiple reminders (e.g., 1 day before, 1 hour before) Snooze option Priority levels (Low / Medium / High) Voice input option (optional AI)  Recurring Reminders Options: Daily Weekly Monthly (important for bills) Custom repeat (e.g., every 3 months) Example: Rent → every month on 1st Subscription → every 15th (Recurring reminders are a key feature in real apps)  Bill Scanner (OCR Feature) Take a photo of a bill/receipt App auto-detects: Amount Date Vendor/shop name Saves data automatically  This is based on real OCR tech used in apps where AI extracts bill details from images  Money Tracker / Expense Manager Track: Daily expenses Monthly spending Features: Categories (Food, Travel, Bills, etc.) Graphs & charts Total spending overview Budget setting  Login & Signup System Email + Password Google login (optional) Forgot password system Secure data storage  Smart Notifications (Advanced) Reminders based on behavior: "You usually pay rent on 1st—set reminder?" Overdue alerts: "Bill not paid yet!" Daily summary: "You have 3 tasks today"  Calendar + Dashboard View: Tasks Bills Expenses Monthly overview Highlight important dates  Analytics & Reports Monthly spending report Category breakdown Payment history Export to PDF/CSV  Bonus Advanced Features (Optional) AI assistant (chat-based planning) Voice commands Dark mode Widget (home screen reminders) Multi-device sync (cloud)  UI/UX IDEA Clean dashboard: Today's tasks Upcoming bills Expense summary Floating "+" button: Add task / scan bill Minimal and fast. bell icon for reminders and a calendar for history

Product Requirements Document: SmartTask - Reminder and Expense Tracker

Problem Statement

Busy professionals often struggle to manage multiple tasks, bills, and expenses, leading to missed deadlines, late payments, and overspending. Current solutions are either too complex or lack comprehensive features to address these needs holistically.

Goals & Success Metrics

Goals

1. Simplify task and bill management for busy professionals.
2. Provide intelligent reminders based on user behavior and critical dates.
3. Offer an efficient expense tracking and budgeting system.
4. Ensure a seamless user experience with multi-device sync and optional advanced features.

Success Metrics

1. User Acquisition: 10,000 active users within the first 6 months.
2. User Retention: 70% of users remain active after 90 days.

3. Task Completion Rate: 85% of scheduled tasks are completed on time.
4. Expense Tracking Accuracy: 95% of scanned bill details are accurately extracted.
5. User Satisfaction: 4.5/5 rating on app stores.

User Stories

1. As a user, I want to set a task reminder with a specific date and time, so I can manage my to-do list effectively.
2. As a user, I want to set multiple reminders (e.g., 1 day before, 1 hour before) for important tasks, so I don't miss them.
3. As a user, I want to snooze a reminder, so I can postpone it if I'm busy.
4. As a user, I want to set priority levels for my tasks, so I can focus on the most important ones first.
5. As a user, I want to set recurring reminders (daily, weekly, monthly, custom repeat), so I can manage regular tasks and bills.
6. As a user, I want to scan a bill/receipt with my phone, so the app can automatically extract the amount, date, and vendor/shop name.
7. As a user, I want to track my daily and monthly expenses, so I can manage my budget better.
8. As a user, I want to categorize my expenses (Food, Travel, Bills, etc.), so I can see where my money goes.
9. As a user, I want to view graphs and charts of my spending, so I can understand my financial patterns.
10. As a user, I want to set a monthly budget, so I can stay within my financial limits.
11. As a user, I want to receive smart notifications based on my behavior and critical dates, so I don't miss important tasks or bills.
12. As a user, I want to view my tasks, bills, and expenses in a clean and organized dashboard, so I can quickly see what I need to do.
13. As a user, I want to secure my data with a login and signup system, so my information is protected.
14. As a user, I want to sync my data across multiple devices, so I can manage my tasks and expenses from anywhere.

Functional Requirements

1. Task Management:

- Set tasks with specific dates and times.
- Set multiple reminders (1 day before, 1 hour before, etc.).
- Snooze reminders.
- Set priority levels (Low, Medium, High).
- Set recurring reminders (daily, weekly, monthly, custom repeat).

2. OCR Bill Scanner:

- Scan bills/receipts using the camera.
- Automatically detect and extract the amount, date, and vendor/shop name.
- Save extracted data automatically.

3. Expense Tracker:

- Track daily and monthly expenses.
- Categorize expenses (Food, Travel, Bills, etc.).
- View graphs and charts of spending.
- Set and track a monthly budget.
- Export monthly spending reports to PDF/CSV.

4. Smart Notifications:

- Receive reminders based on user behavior and critical dates.
- Receive overdue alerts.
- Receive daily summaries of tasks.

5. Calendar + Dashboard:

- View tasks, bills, and expenses in a clean and organized dashboard.
- Highlight important dates.
- Monthly overview of expenses and tasks.

6. Login & Signup System:

- Secure login with email and password.
- Optional Google login.
- Forgot password system.
- Secure data storage.

7. Optional Advanced Features:

- AI assistant for chat-based planning.
- Voice commands.
- Dark mode.
- Home screen widget for reminders.
- Multi-device sync (cloud).

Non-Functional Requirements

1. Performance:

- App should load and respond within 2 seconds.
- OCR should extract bill details within 5 seconds.

2. Security:

- User data should be encrypted both in transit and at rest.
- App should comply with GDPR and other relevant data protection regulations.

3. Usability:

- App should be intuitive and easy to use.
- Minimal and fast user interface with a clean dashboard.

4. Reliability:

- App should have an uptime of 99.9%.
- Data should be backed up regularly to prevent loss.

Open Questions

1. Which third-party services will be used for OCR and voice commands?
2. What is the preferred cloud service for multi-device sync?
3. How will the AI assistant be integrated and trained?
4. What are the specific design guidelines for the UI/UX?
